PrintCare Varnishing Plate

Polymer

PrintCare Polymer is our newly developed varnishing plate for offset coating. The special surface and solvent resistant construction gives a product suitable for long run water based (aqueous) and UV coating applications.

INNOVATION	AtéCé a major global blanket converter leads the industry with innovative blanket development. Our commitment is to continue developing and delivering innovative products that improve
TECHNOLOGY	PrintCare compressible layer is the most advanced production technique available and is the next generation in blanket manufacturing.
RELIABILITY	The consistency and quality of our new PrintCare compressible layer technology and improved gauge control from our advanced buffing techniques gives a superior result, faster recovery on press, improved smash resistance and reduces gauge loss.
VALUE	Improvements provided by PrintCare compressible layer means exceptional long life from the blanket, improving production time and reducing down-times on press.
ECOLOGY	PrintCare compressible layer production is solvent free, another first in innovation from AtéCé.

surface

Rubber compound	Polymer
Surface finish	Polymer Blend
Roughness (Ra)	1,4 µm
Colour	Pink

construction

Compressible layer design	Microsphere PrintCare
Nominal thickness	1.15 mm & 1.35
Relief Depth	0.80 - 1.00 mm

physical property

Overall hardness (Shore A)	68°
