PrintCare Stripping blanket

StripperBlue

The specially formulated and smooth cast surface ensures a consistent coating transfer for excellent results. The special surface and solvent resistant construction gives a product suitable for water based (aqueous) and UV coating applications.

INNOVATION	AtéCé a major global blanket converter leads the industry with innovative blanket development. Our commitment is to continue developing and delivering innovative products that improve
TECHNOLOGY	PrintCare compressible layer is the most advanced production technique available and is the next generation in blanket manufacturing.
RELIABILITY	The consistency and quality of our new PrintCare compressible layer technology and improved gauge control from our advanced buffing techniques gives a superior result, faster recovery on press, improved smash resistance and reduces gauge loss.
VALUE	Improvements provided by PrintCare compressible layer means exceptional long life from the blanket, improving production time and reducing down-times on press.
ECOLOGY	PrintCare compressible layer production is solvent free, another first in innovation from AtéCé.

surface

Rubber compound	Rubber
Surface finish	Smooth Cast surface
Roughness (Ra)	1,4 µm
Colour	Green

construction

Compressible layer design	Microsphere PrintCare
Nominal thickness	1.95 mm
Relief Depth	0.80 mm

physical property

Thickness range	1.95 ± 0.01 mm
Overall hardness (Shore A)	77°
Peel strength	15 - 25 N/25mm
